

SHUBHAM KULKARNI

Senior Automation Engineer • Test Automation • Quality Engineering

Pune, India | +91 87888 65001 | skulkarni3795@gmail.com | linkedin.com/in/shubham-kulkarni-2b1707114

PROFESSIONAL SUMMARY

Senior Automation Engineer with around 9 years of experience building and scaling test automation for mission-critical products across public safety, banking, healthcare, and automotive. Deep hands-on expertise in Playwright, Selenium, and C#, with strong ownership of CI/CD delivery on Azure DevOps and Azure Pipelines. Recent work cut release cycles by 30%, lifted automation coverage by 50%, and introduced AI-agent workflows that brought feature turnaround from 12 hours to under 4. Works day to day with UK and US-based global teams, mentoring engineers and keeping test code clean, reliable, and maintainable.

TECHNICAL SKILLS

Test Automation: Playwright, Selenium WebDriver, C#, NUnit, Reqnroll, SpecFlow, Page Object Model (POM), Parallel Execution, Cross-Browser Testing

Service Virtualization & API: WireMock, REST API Testing, RestSharp, Postman

CI/CD & DevOps: Azure DevOps, Azure Pipelines, CI/CD, Git, Docker, Build & Release Automation, Allure Reporting

Programming & Methodologies: C#, .NET, Core Java, SQL, BDD, Agile / Scrum, Test Strategy, Risk-Based Testing, QA & QC

AI Engineering: GitHub Copilot, AI-Driven Test Automation, Multi-Agent Workflows, Human-in-the-Loop Validation

Domains: Public Safety (911 / Emergency Response), Banking, Healthcare, Autonomous Vehicles (ADAS)

PROFESSIONAL EXPERIENCE

Senior Automation Engineer

Apr 2022 – Present | Pune, India

NICE Ltd – *Public safety – 911 & emergency-response products*

- Contributed to and helped scale a modular Playwright and C# automation framework that now covers 1,000+ critical tests for public-safety and emergency-response products.
- Built parallel test execution into Azure Pipelines, cutting build-verification time by 30% and tightening the CI/CD feedback loop.
- Collaborated daily with UK-based counterparts in a cross-functional team of ~20 (development, QA, and product), shaping test strategy around user stories and strict service-level agreements (SLAs).
- Mentored 2-4 junior engineers on C#, POM design, and Playwright practices, with regular code reviews.

Software Consultant

Jan 2021 – Apr 2022 | Pune, India

Capita – *Banking – HSBC & Virgin Money*

- Led quality-engineering for HSBC and Virgin Money within a 10-member team, standing up and scaling test infrastructure for security-sensitive banking applications.
- Built maintainable Selenium WebDriver and C# suites running across IaaS VM and PaaS App Service environments.
- Owned the CI setup in Azure DevOps, keeping builds fast and deployments verified with zero downtime.
- Authored test plans and BDD specifications (SpecFlow, C#) with UK-based stakeholders to meet core banking requirements.

Test Automation Engineer

Jul 2019 – Dec 2020 | Pune, India

Eteva – *Healthcare – AODocs & ServiceNow*

- Reviewed system architecture to identify high-risk areas and turned complex business requirements into focused test cases.
- Wrote BDD test suites with Selenium WebDriver, C#, and SpecFlow, closing gaps between business and development teams.
- Managed Azure DevOps day to day — work items on Azure Boards, Git repositories, and CI pipeline configuration.

Process Executive – Automation & Data Validation

Dec 2017 – Jun 2019 | Pune, India

Spectrum (NVIDIA) – *Autonomous vehicles (ADAS)*

- Ran data-factory and ADAS validation using Hatch-based data ingestion and image-analysis pipelines.
- Set up QA and QC processes to keep autonomous-driving datasets accurate and compliant.
- Built custom test utilities for tricky edge cases, improving the reliability of model-training data.

KEY ACHIEVEMENTS

- **AI-Driven Test Case Lifecycle** — Built an end-to-end flow using multiple AI agents to pull use cases from Azure DevOps features, turn them into test cases, generate upload-ready test-plan CSVs, auto-create Reqnroll feature files, and scaffold automation code with human-in-the-loop review, cutting feature turnaround from 12 hours to under 4 (about 66% faster).
- **30% Faster Releases** — Reworked Playwright execution to run in parallel, cutting regression runtimes by roughly 30%.
- **50% Coverage Boost** — Grew automation coverage by 50% across core legacy applications, sharply reducing manual regression effort.
- **Modernized the BDD Framework** — Led the migration from legacy SpecFlow to Reqnroll for better maintainability, speed, and .NET compatibility.
- **Actionable Reporting** — Integrated Allure Reporting with Azure DevOps pipelines to give stakeholders clear, searchable test results.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900), 2021
- ISTQB Certified Tester – Foundation Level (CTFL), 2021
- ISTQB Certified Tester – Agile Tester Extension, 2023

EDUCATION

Bachelor of Engineering, Electronics & Telecommunication

Pune University | 2017
